VARSHINI BALAJI

Chennai, Tamil Nadu, India | (+91) 6369858431 | Varshini.balaji.rangachari@gmail.com | linkedin.com/in/varshinibalaji

PROFESSIONAL SUMMARY

MBA candidate specializing in Marketing and Analytics, with a Computer Science engineering foundation that brings technical fluency to data-driven marketing.

EDUCATION

MBA, Marketing and Analytics | Amrita School of Business, Amrita Vishwa Vidyapeetham, Coimbatore, TN
Jul 2024 – September 2026
***CGPA:** 6.61 / 10.0 (T4 results pending)*

B.Tech, Computer Science & Engineering | S.R.M Institute of Science & Technology, Ramapuram Campus, Chennai, TN
Jun 2018 – May 2022
CGPA: 8.64/10

MARKETING EXPERIENCE

Brand Strategy & Marketing Intern | Rubecon Ad Agency LLP Communications Pvt Ltd
May 2026 – Jun 2026

- Worked across 10+ client brands spanning FMCG, paints, eyewear, dairy, and fintech categories, contributing to brand visibility, content strategy, and competitive analysis.
- Led a multi-phase brand analysis for an eyewear client: studied TV/OOH campaigns and positioning, mapped social content patterns, and gathered consumer insights via market visits and interviews.
- Conducted a 5-phase paint category deep-dive (Indian vs. international) and delivered a competitive pricing analysis for an ice-cream brand's product portfolio.

Digital Marketing Intern | Integrated Enterprises (India) Pvt. Ltd., Chennai
Apr 2025 – Jun 2025

- Completed a 9-week internship in the Digital Marketing Division with hands-on exposure to SEO, Google Ads, social media management, and email campaigns.
- Contributed to STRI, a women-focused initiative, by conducting market research, supporting event execution, and strengthening digital outreach.
- Applied digital marketing concepts across live projects, demonstrating fast ramp-up, adaptability, and initiative while collaborating cross-functionally to deliver quality outputs on schedule.

ANALYTICS & MARKETING PROJECTS

California House Price Prediction — ML Pipeline (currently working on)

- To Build an automated Python preprocessing and regression pipeline, optimizing model accuracy via feature engineering.

Plate2Plate — BDM Data Pipeline & Dashboard (Currently Working On)

- Designing a PostgreSQL database via Supabase and building an interactive Streamlit-Python dashboard for real-time food distribution and surplus tracking.

Market Potential Estimation — AI Personal Stylist & Virtual Fitting Room | Amrita School of Business
Jan 2025 – Mar 2025

- Estimated total addressable market using industry data, customer-level demand modeling, and secondary research.

ESG Sustainability Analysis | IBA
Jul 2025 – Sept 2025

- Analyzed 5 years of sustainability report data on carbon emissions and energy use to surface environmental performance trends and inform strategy recommendations.

Credit Card Fraud Detection — Supervised & Unsupervised Learning | B.Tech Capstone
Jul 2021 – Dec 2021

- Built a fraud detection model in Python, achieving a 97.34% F1-score using supervised learning techniques on transaction data.

TECHNICAL INTERNSHIPS (B.TECH)

Development Trainee | GAVS Technology

- Built a small-scale application using Spring Boot, MySQL, and Angular, integrated end-to-end via REST API.

Front-End Developer Intern | Innoura Technology

- Built the front-end of a healthcare application using HTML, CSS, and React JS, integrated via REST API and CI/CD (Jenkins).

Additional internships: The Sparks Foundation (banking application prototype, MySQL); Business Web Solution (full-stack development with Python/Django).
